

BALDWIN

WASTEWATER MANAGEMENT

BUSTA UNIT

Manufactured by Baldwin Industrial Systems

DEVELOPED TO BE COMPACT, TOUGH AND EASY TO OPERATE

Single Application & Simple Steps

Specifically designed for small volumes of difficult to treat waste water in a single application. Ideal for Commercial and Small Industrial users generating as little as 100 litres of contaminated waste per day.

1. **FILL** Transfer your waste water into the treatment tank, when and how it suits you.
2. **MIX** Add RM-10 Chemical and turn on. Auto/Off timer allows you to return whenever.
3. **DRAIN** Open valve to drain clean water to sewer (or re-use). Drain encapsulated sludge into Filter Bag. Leave to drain until you want.
4. **EMPTY** Dump Sludge into waste bin. Refit Filter Bag and close valves. Unit is now ready to treat another batch.

Some Typical Applications

PRINT SHOPS - Screen Printing; Litho; Flexo; Offset etc.

MACHINE SHOPS - Coolants; Lubricants; Quench; Surface Preparation etc.

WORK SHOPS - Parts Washing; Rinsing; Engine Degreasing etc.

GENERAL - Process Waste; Floor Washing; Vehicle Washdown; Recycle etc.

CHEMICAL PROCESSING - Waste Water Treatment

Separates & Removes

EMULSIFIED OILS
PHOSPHATES

HEAVY METALS
FATS AND GREASES

SUSPENDED SOLIDS

Features & Benefits

* Versatile and Flexible. Should your waste water change, the Busta Unit will allow additional chemical dosage, longer mix times, or a different chemical formula.

* Minimal installation costs - simply connect power to the mixer and connect clean water to the sewer ... and turn it on!

* Ideal batch size from 300 to 500 litres. Enables daily or weekly treatment to suit your volume of waste water.

* The Re-usable filter bags for sludge collection and disposal

* Two discharge valves allow clean water to be released first (for possible reuse) no matter what type of waste water is being treated.

* Rental Terms are available - Low deposit, plus easy monthly payments.

RM-10 Chemical

Clay based chemicals are pre-blended with minerals, inorganic and organic acids, bases and polymers. A unique feature of RM-10 Chemicals is that they permanently encapsulate all the contaminants enabling discharge of sludge to Landfill.
